<b>Predictability</b>	

There were many high performing trades and the algorithm correctly predicted 10 out of 10 trades. ANET was the highest-earning trade with a return of 63.67% in 1 Year. CMA and RJF followed with returns of 58.73% and 58.01% for the 1 Year period. The package itself saw an overall return of 42.59%, providing investors with a 18.85% premium above the S&P 500's return of 23.74% for the same time period.

Algorithmic traders utilize these daily forecasts by the I Know First market prediction system as a tool to enhance portfolio performance, verify their own analysis and act on market opportunities faster. This forecast was sent to current I Know First subscribers.

## How to interpret this diagram

Algorithmic Stock Forecast: The table on the left is a stock forecast produced by I Know First's algorithm. Each day, subscribers receive forecasts for six different time horizons. Note that the top 10 stocks in the 1-month forecast may be different than those in the 1-year forecast. In the included table, only the relevant stocks have been included. The boxes are arranged according to their respective signal and predictability values (see below for detailed definitions). A green

**box represents a positive forecast, suggesting a long position, while a red represents a negative forecast, suggesting a short position.**

**Please note-for trading decisions use the most recent forecast.**
